Countries highlighted in yellow are endemic. Countries highlighted in pale yellow are considered to have active transmission (i.e. within the previous 6 months) of an imported poliovirus.

<sup>1</sup>Data in WHO HQ on 02 Nov 2010 for 2010 data and 01 Nov 2011 for 2011 data. <sup>2</sup>Wild viruses from environmental samples, contacts and other non-AFP sources. <sup>3</sup>The 2010 total includes cases with inadequate specimens that have been exceptionally classified as confirmed polio based on their association with the WPV1 outbreak. <sup>4</sup>Includes 2 cases in 2008 & 2006 and 3 in 2009, 2007, 2005 with a mixture of W1W3 virus. <sup>5</sup>All cases are importation related. NA. Most recent case had onset prior to 1999. <sup>6</sup>All cases from 2003 onward are importation related. <sup>7</sup>All cases from 2005 onward are importation related. <sup>8</sup>In 2005, no endemic circulation occurred in Egypt or Niger but their status remained endemic.
